Design versus Design

nordiCHI 2000

The First Nordic Conference on Computer-Human Interaction

23-25 October 2000, Royal Institute of Technology, Stockholm, Sweden

NordiCHI 2000

The conference is organised by STIMDI (the Swedish Interdisciplinary Interest group for Human Computer Interaction) in co-operation with HCI organisations from the other Nordic countries. The conference is supported through grants from the ACM SIGCHI.

The Scandinavian tradition has made a great impact on the development of co-operative and user centred design, based on the traditions of a close co-operation between developers and users. Scandinavia has also made a significant contribution in driving the design of mobile devices through Nokia and Ericsson. Scandinavian design is a well-known style in the design of furniture and interiors. Despite the existence of several excellent conferences within the area of HCI we see the need for a discussion forum with a Nordic perspective. Therefore we invite researchers and practitioners from all the Nordic countries as well as the rest of the world to submit and participate in the making of a more usable future.

We encourage submissions within a wide range of HCI topics, especially focusing upon:
- Co-operative design
- User-centred design
- Scandinavian system development philosophy
- Current research on HCI in the Nordic countries
- Usability and Accessibility
- Information technology in everyday life
- Social and psychosocial effects of IT use
- Art and communication
- Ubiquitous computing and mobile devices
- Visualisation

Language

Papers should be written in English, however, we encourage the authors to add an abstract in their native Nordic language. All presentations will be held in English.

Important dates

May 2, 2000	Deadline for submission of papers (max 10 pages)
August 1, 2000	Deadline for submission of short papers (1-2 pages), posters and demonstrations/videos
August 15, 2000	Notification of acceptance for papers. Deadline for submissions to the doctoral consortium.
August 30, 2000	Notification of acceptance for short papers, posters, and demonstrations/videos

Submission and submission categories

Papers describing research or design cases should be of 4-10 pages.

Short papers describing late breaking results or organisational overviews should be of 1-2 pages. Industrial submissions are very much appreciated.

Posters and *demonstrations/videos* will be displayed during the conference. We especially welcome interactive posters.

Submissions to the doctoral consortium should be sent to Kristina Höök, kia@sics.se.

In case you would want to arrange a workshop or a tutorial in connection with the conference please get in contact with the conference administration (NordiCHI@stimdi.se) as soon as possible.

Papers must be submitted in electronic format (pdf) and should follow the NordiCHI publications template, which will be available from the NordiCHI Website. The proceedings will only be published electronically on a CD and on the conference web site. We encourage submissions of an interactive nature, since this can be easily reproduced on a CD. However, the format should then include the player for the specific application. Supported software environments are MacOS and Windows.

General Chair

Jan Gulliksen
Uppsala University and
Royal Institute of Technology

Co-chair

Ann Lantz
Royal Institute of Technology

Programme committee

SWEDEN

Kerstin Severinson Eklundh, Royal Institute of Technology
Gunilla Bradley, Mid Sweden University
Pelle Ehn, Malmö University
Nils-Erik Gustafsson, Ericsson Utvecklings AB
Kristina Höök, Swedish Institute for Computer Science
Jonas Löwgren, Interactive Animation Studio
Yngve Sundblad, Royal Institute of Technology
Yvonne Waern, University of Linköping

DENMARK

Morten Borup Harning, Copenhagen Business School
Jacob Buur, Danfoss A/S
Peter Bøgh Andersen, University of Aarhus
Susanne Bødker, University of Aarhus
Peter H. Carstensen, The IT University of Copenhagen
Kaj Grønbæk, University of Aarhus
Finn Kensing, The IT University of København
Morten Kyng, Danish Nation Centre for IT research
Kim Halskov Madsen, University of Aarhus

NORWAY

Svein Arne Arnesen, EDB 4Tel A/S
Gautam Ghosh, Objectware AS
Eevi Beck, University of Oslo
Tone Bratteteig, University of Oslo
Erik G. Nilsson, Sintef SI
Knut Nordby, Telenor FoU
Dag Svanæs, Norwegian University of Science and Technology
Pål Søgård, Statskonsult

FINLAND

Timo Jokela, University of Oulu, on leave from Nokia,
Kari Kuutti, Helsinki University of Technology
Helena Karasti, University of Oulu
Kari-Jouko Räihä, University of Tampere
Eija Suikola, TeamWARE Group
Klaus Tuurala, Sonera
Kaisa Väänänen-Vainio-Mattila, Nokia

ICELAND

Ebba Thora Hvannberg, Computer Science and System Engineering Laboratory, University of Iceland
Marta Kristín Lárusdóttír, EJS
